---

We confirm that the safety and security of the guests visiting Disneyland Paris has always been and continue to be the priority of Euro Disney SCA and as such we are very aware of the importance of such matters within our Resort.

As Disneyland Paris is a tourist destination welcoming a significant number of Guests throughout the year, we are obliged to strictly apply the relevant laws and guidelines that govern this type of destination.

Our theme parks and hotels are inspected regularly by French health and safety organizations, whose approval and authorization is required before the opening and continuance of any public building. In addition, each attraction is subjected to specific controls by internal inspections and external "Bureaux de Contrôle", independent companies specialized in the safety, quality and efficiency of attractions throughout Europe.

We would also like to emphasize that all playground areas in our Resort are conform to applicable French statutory requirements that define the necessary security measures which have to be taken and which required the necessity for regular inspections.

Our Emergency Response System has been validated by Public authorities and submitted to periodic evaluation by theses authorities. In addition, we also have permanent medical, fire prevention and security teams present at our Resort at all times.

Finally, all of our Cast-Members are trained in emergency and evacuation procedures for guests, including disabled Guests.

The third party and products liability of ED is covered by a first class insurer with limits of indemnity sufficient to cover damages suffered by our guests during their stay.

Yours faithfully,

A handwritten signature in blue ink, appearing to be "P. Chatelot", written in a cursive style.
